Ukrainian

Native

English

Intermediate

About

Started training at the end of 2021. In 2022, stubbornly learned the main technologies. In 2023 I wrote my first projects. Dedicated Junior React Developer with a keen interest in web development. Daily work with React and in-depth knowledge of JavaScript allows me to create dynamic and efficient web applications. I have a passion for solving complex problems and enjoy the results. Ready to learn new technologies and eager to continuous professional development. I have a desire to contribute to teamwork and solve various web development challenges.

Commercial experience

07.06.2023 - 17.07.2023 - **Development of the site of building materials**
The work was carried out in a team of two people (github). In the stack we used ReactJS, Redux Toolkit and TailwindCSS. To write the server I used NodeJS, ExpressJS and MongoDB. As a result, a multifunctional website was written, as well as a secure admin panel for actions with goods and orders were developed. Developed website - <https://stroysetshop.com/>

My projects

Wrote more than 20 training projects, which allowed in-depth study of technology, gaining the necessary experience to write projects. You can see them on my github account.

03.05.2023 - 04.06.2023 - **Online pizzeria website development**

Developed website - <https://savorslicehub.netlify.app/>

16.09.2023 - 29.10.2023 - **Task platform development**

Developed website - <https://quest-tasker.netlify.app/>
